### Magics

### Model Rules

**Armour Piercing (6):**

**Daemonic Instability:** When a unit with this Special Rule fails a Break Test, it does not flee from combat. Instead, it suffers a number of Wounds equal to the amount by which the test was failed (Simplified formula: 2D6+CSLd), ignoring the usual minimum 0 for its Leadership Characteristic. These Wounds are distributed following the rules for Unstable, with no saves of any kind allowed. Only characters with Daemonic Instability can join units with Daemonic Instability, and Characters with Daemonic Instability cannot join units without Daemonic Instability. If a model has both Daemonic Instability and Unstable, disregard the latter.

**Innate Defense (5+):**

**Otherworldly:** Models with this special rule have Magical Attacks, are Immune to Psychology and have a Ward Save (5+). Units with the Otherworldly special rule can only be joined by Otherworldly Characters. Similarly, Otherworldly Characters can only join Otherworldly units.

**Swiftstride:** When a unit composed entirely of models with this special rule rolls Charge Range, Flee Distance, Pursuit Distance or Overrun Distance, it rolls an additional D6 (normally this will lead to rolling 3D6) and discards the lowest dice.

**Wizard Apprentice - Generates spells from Occultism:**
