### Magics

### Model Rules

**Brood's Courage (Rats-at-Arms, Vermin Guard):** A unit with this special rule can use the Full Ranks of units of (X) within 6" as their own for the purpose of calculating the Leadership bonus from Safety in Numbers.

**Callous:** A model with this special rule is allowed to use non-Artillery Shooting Weapons against an enemy unit which is Engaged in Combat with friendly units if all friendly units Engaged in the Combat are Infantry and/or Swarms. All units Engaged in this Combat are ignored for Cover purposes. When shooting at an enemy unit Engaged in Combat with friendly units, roll to hit as normal and then randomize each hit scored. On a 4+ it hits the target, otherwise it hits a friendly unit Engaged in that Combat (randomize if several friendly units are involved in the Combat).

**Heavy Armour:**

**Insignificant:** Units consisting entirely of models with this special rule do not cause Panic Tests on friendly units without this special rule. Only Insignificant Characters can join units with Insignificant R&F models.

**Meat Grinder:** Type: Hand Weapon. The wielder gains Impact Hits (2D6) and Grinding Attacks (2D6) when using this weapon. These Impact Hits and Grinding Attacks are resolved at Strength 4 with Armour Piercing (1).

**One with the Swarm:** Meat Grinders can only join units of Rats-at-Arms, and loses Insignificant when it does so.

**Safety in Numbers:** Non-fleeing units comprised solely of models with this special rule add their number of Full Ranks after the first one to their Leadership (up to a maximum of +3). This rule cannot be used to modify the Leadership that is distributed by models with Inspiring Presence (but the received Inspiring Presence can be modified by Safety in Numbers). Furthermore, if all models in a unit have this special rule, this unit gains a +1 modifier to its Flee Distance rolls.

**Tag-Along:** If a model with this special rule is within 3" of a non-fleeing Rats-at-Arms or Vermin Guard unit, it gains Ward Save (4+) against Ranged Attacks.

**War Platform:** Models with this special rule may join units as if they were Characters, even if they are not Characters and even if they are Large Targets, and follow the rules for Characters with regards to distributing hits. While joined to and moving with a unit consisting of 5 or more models (besides the War Platform itself) a model with the War Platform special rule may March even though its Troop Type would normally forbid it, for example if it is a Chariot. When joined to a unit, it must always be placed in the centre of the front rank, possibly pushing back models with the Front Rank rule, and must keep its position in the centre of the front rank at all times. If two positions are equally central (this is the case in a unit with an even number of models in the first rank), the War Platform can be placed in either of these positions. If the War Platform cannot be placed in the centre of the front rank (for example due to Mismatching bases or the front rank being too narrow), the model cannot join the unit. This means that a War Platform can never join a unit with Mismatching bases and that only a single War Platform can ever be in the same unit. Models with this rule lose Swiftstride.

### Qr codes of your army

Your can print this page to have all your army's units qrcode and cut them to stick them on your units, with them you can directly access to the unit's profil with your phone.

Meat Grinder #1
